

Contents

			Page
1. Introduction	01
2. Salinity and state of marine water (Density)			02
3. Composition of seawater	03
4. Principle of constant proportion		...	04
5. Water Properties adapted for salinity determination			05
5.1 Chlorinity	05
5.2 Gravimetry	06
5.3 Density or refractive index		...	07
5.4 Conductivity	09
6. Sampling techniques	13
7. Temporal and spatial variations of salinity			16
8. Accuracy of salinometers	17
9. References	18
Annex 1. Fortran Program to calculate Salinity from Conductivity, Temperature and Pressure			20
