

CONTENTS

CHAPTER 1. General Introduction	1
CHAPTER 2. Food consumption, growth and growth efficiency of rainbow trout (<i>Oncorhynchus mykiss</i> (Walbaum)) fed on diets containing a bacterial single-cell protein	41
CHAPTER 3. Consumption and apparent absorption efficiencies of amino acids in rainbow trout (<i>Oncorhynchus mykiss</i> Walbaum)) eating diets containing bacterial single-cell protein	60
CHAPTER 4. The effect of dietary bacterial single-cell protein on protein synthesis, RNA content and free amino acid concentrations in white muscle of rainbow trout (<i>Oncorhynchus mykiss</i> (Walbaum))	75
CHAPTER 5. Estimation of an optimum dietary lysine level for rainbow trout (<i>Oncorhynchus mykiss</i> (Walbaum))	100
CHAPTER 6. The effect of dietary lysine on protein synthesis, RNA content and free amino acid concentrations in white muscle of rainbow trout (<i>Oncorhynchus mykiss</i> (Walbaum))	125
CHAPTER 7. General Discussion	137
