

## Contents

Acknowledgements .....	4
List of papers .....	5
List of abbreviations .....	6
1. Introduction .....	7
1.1. Metamorphosis .....	7
1.2. Abnormal development and effect of nutrition .....	8
2. Aims.....	14
3. Background.....	15
3.1. Nomenclature, chemical structure and properties of retinoids .....	15
3.2. Dietary sources of vitamin A .....	16
3.3. Absorption and transport .....	17
3.4. Metabolism and regulation .....	18
3.5. Functions of retinoids .....	19
4. Methodological considerations.....	22
4.1. Requirement studies for micronutrients with an upper and lower limit of safe intake .....	22
4.2. Chemical response: The analysis of retinoids in whole fish and organs .....	24
4.3. Biochemical and cellular responses.....	26
4.4. Physiological responses .....	28
4.5. Integrated validation of the responses .....	29
5. General discussion.....	30
5.1. Larval sources of retinoids .....	30
5.2. Conversion of carotenoids in Atlantic halibut .....	31
5.3. Requirement of vitamin A in Atlantic halibut .....	33
5.4. Retinoids in larvae fed live feed .....	36
5.5. Validity of extrapolations .....	37
5.6. Is the larval requirement covered by <i>Artemia</i> ?.....	39
6. Conclusions .....	40
Future perspectives .....	41
References .....	43
