Table of Contents.....	i
List of Figures.....	ii
List of Tables.....	v
Abstract.....	iv
1. Introduction	1
2. Materials and Methods	7
3. Results.....	24
4. Discussions.....	44
5. Conclusions.....	49
6. Acknowledgements.....	50
7. References	51

List of Figures

- Figure 1. RT-PCR product of GH cDNA confirmation through the 1.0% agarose gel electrophoresis.....24
- Figure 2. Plasmid isolation of GH cDNA cloning, confirmation by on the 0.7% agarose gel electrophoresis.....25
- Figure 3. cDNA nucleotide sequence of Siberian sturgeon GH gene.....26
- Figure 4. The deduced amino acids sequence of Siberian sturgeon GH gene cDNA.....27
- Figure 5. Multiple alignments of mature peptide and signal peptide of Siberian sturgeon GH gene cDNA with other vertebrae GH gene cDNA mature peptide and signal peptide amino acids sequences, analyses were conducted in ClustalW2.....29
- Figure 6. Multiple alignments of Siberian sturgeon GH gene cDNA mature peptide with other vertebrae GH gene cDNA mature peptide amino acids sequences, analyses were conducted in ClustalW2.....30

Figure 7. Multiple alignments of Siberian sturgeon GH gene cDNA mature peptide with other vertebrae GH gene cDNA mature peptide amino acids sequences, analyses were conducted in ClustalW2.....31

Figure 8. Multiple alignments of Siberian sturgeon GH gene cDNA mature peptide with other vertebrae GH gene cDNA mature peptide amino acids sequences, analyses were conducted in ClustalW2.....32

Figure 9. Multiple alignments of Siberian sturgeon GH gene cDNA mature peptide with other vertebrae GH gene cDNA mature peptide amino acids sequences.....33

Figure 10. Evolutionary relationships of taxa37

Figure 11. RT-PCR analysis of *Acipenser baerii* GH gene mRNA expression in tissues. Such as, Brain (B), Eye (E), Fin (F), Gill (G), Heart (H), Intestine (I), Kidney (K), Liver (L), Muscle (M), Spleen (S), Gonad (Go).....39

Figure 12. GH gene transcripts expression analysis, using RT-PCR for Siberian sturgeon development stages.....40

Figure 13. RT-PCR Analysis of *Acipenser baerii* GH gene mRNA
expression in tissues. Such as, Brain (B), Eye (E), Fin (F), Gill (G),
Heart (H), Intestine (I), Kidney (K), Liver (L), Muscle (M), Spleen
(S), Gonad (Go).....41

Figure 14. GH gene transcripts expression analysis by using RT-PCR for
Siberian sturgeon tissues42

Figure 15. GH gene genomic structure of Siberian sturgeon, it has four
introns and five exons.....43

List of Tables

Table 1 Primers were used for amplify genomic DNA in Siberian sturgeon GH gene.....	18
Table 2 Developmental stages of Siberian sturgeon embryos and larvae...	22
Table 3 The Siberian sturgeon GH gene cDNA compared with different vertebrae growth hormone gene cDNA, Isoelectric point (pI) and molecular weight (MW) of mature peptides	34
