LIST OF FIGURES

Fig.		Page
No.	Name of Figure	No.
1.	Quadrat using for sampling	22
2.	Schematic illustration of the extraction methods of plant bioactive compounds using different solvent	35
3.	Variation among different species thallus height	47
4.	Variation among different species thallus width	47
5.	Variation among number of branches in thallus of different species	48
6.	Variation among the number of branchlets in different species	48
7.	Variation of length of stalk in different species	49
8.	Variation of the length of rhizoid in different species	49
9.	Variation among the length of branchlets in different species	50
10.	Variation among the width of branchlets in different species	50
11.	Variation among apical width of different species	51
12	Mean thallus height and width of different species	52
13	Mean number of main branches and branchlets of different species	52
14	Mean Length and width of different component of thallus in different species	53
15	Mean Length and width of of branchlet in different species	53
16	Scree plot according to the variance of the morphological characters	55
17	Component plot against component 1and2 of different morphological character	55

18	Dendogram of different species	57
19	Histological characteristic (cortical cell length and width) of different species	60
20	Histological characteristic of different species	60
21	Different composition contained in different species	67
22	Percentage of fatty acid categery in different species	68
23	Percentage of fatty acid in different species	70
