TABLE OF CONTENTS

| | |
|------------------------------------------------------------------------------------------------------------------------------------|----|
| CHAPTER 1 | 1 |
| 1. INTRODUCTION | 2 |
| 1.1 Background of the project..... | 2 |
| 1.2 Main objectives of the project..... | 2 |
| 1.3 Justification of the project' | 3 |
| 1.4 Objectives of the IEE study | 4 |
| 1.5 Methodologies and technologies adopted in IEE report preparation..... | 4 |
| 1.5.1 Water quality analysis..... | 4 |
| 1.5.2 Water exchange..... | 8 |
| 1.5.3 Ecological condition..... | 12 |
| 1.5.4 Sediment characteristics..... | 15 |
| 1.5.5 Dredging..... | 16 |
| 1.5.6 Cultural and socio-economic environment | 16 |
| 1.6 Main beneficiaries..... | 17 |
| 1.7 Description of the applicable laws, regulations standards and requirement. | 17 |
| 1.8 Extent and scope of the study | 19 |
| 1.9 Conformity Fauna and Flora Protection Ordinance (FFPO) and with other existing policies development plans in the area | 19 |
| 1.10 Approvals needed for the proposed development from state agencies..... | 20 |
| CHAPTER 2 | 22 |
| 2. DESCRIPTION OF THE PROPOSED PROJECT | 23 |
| 2.1. Location of the project | 23 |
| 2.2. Extent of the project area | 26 |
| 2.3. Present ownership of the project site | 26 |
| 2.4. Project layout plan | 27 |
| 2.5. Major components of the project | 29 |
| 2.6. Air emission control..... | 37 |
| 2.7. Construction activities..... | 37 |
| 2.8. Details of dredging..... | 38 |
| 2.8.1 Dredging plan..... | 38 |
| 2.8.2 Lagoon bed material to be dredged..... | 38 |
| 2.8.3 Baseline water quality within the dredging area..... | 39 |
| 2.8.4 Transport of dredging materials | 42 |
| 2.8.5 Method of transport..... | 44 |

| | | |
|-----------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| 2.8.6 | Access road | 44 |
| 2.8.7 | Type of vessel to be used | 44 |
| 2.8.8 | Dumping area | 44 |
| 2.9. | Detail drawings | 44 |
| 2.10. | Water supply | 44 |
| 2.11. | Other infrastructure facilities | 44 |
| 2.12. | Waste water..... | 44 |
| 2.13. | Solid waste | 44 |
| 2.14. | Drainage management..... | 45 |
| 2.15. | Implementation plan | 45 |
| 2.16. | Aesthetic & visual environment..... | 45 |
| 2.17. | Future expansions | 45 |
| CHAPTER 3 | | 46 |
| 3. | DESCRIPTION OF THE EXISTING ENVIRONMENT..... | 47 |
| 3.1 | Study area..... | 47 |
| 3.2 | Hydrology & drainage | 48 |
| 3.2.1 | Surface drainage pattern of the area..... | 48 |
| 3.2.2 | Drainage capacity of the existing water ways..... | 49 |
| 3.2.3 | Ground water levels, quality and present uses of ground water..... | 50 |
| 3.2.4 | Any floods experienced within the area during recent past | 51 |
| 3.3 | Geology and soil characteristics | 52 |
| 3.3.1 | Geology | 52 |
| 3.3.2 | Soil characteristics | 53 |
| 3.3.3 | Sediment characteristics in the Lagoon area | 55 |
| 3.4 | Land use | 56 |
| 3.5 | Noise | 58 |
| 3.6 | Ecological resources | 59 |
| 3.6.1 | Existing natural habitats within the study area and their importance (Proximity to forest reserves, wildlife reserves, wetlands etc) | 59 |
| 3.6.2 | Presence of natural habitats both terrestrial and marine and rare, threatened, endemic, fauna and flora within such habitats | 72 |
| 3.6.3 | Availability of any commercially / ecologically important terrestrial / aquatic species..... | 76 |
| 3.6.4 | Details of the coastal environment including coastal and marine habitats including, such as fishing grounds, breeding grounds, fishing activities and interactions with coastal structures..... | 81 |

| | | |
|-----------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 3.6.5 | Distribution, species composition and richness of bottom macrozoobenthos..... | 83 |
| 3.6.6 | Fisheries and aquaculture..... | 85 |
| 3.7 | Historical & archaeological importance | 88 |
| 3.8 | Socio economics environment | 89 |
| 3.8.1 | Presence of settlements within the project site | 89 |
| 3.8.2 | Availability of infrastructure facilities (eg. roads, power and water supply etc. and other resources)..... | 90 |
| 3.8.3 | Socio-economic status of fishers..... | 92 |
| 3.8.4 | Existing environmental problems in the area that may have a bearing on the project..... | 92 |
| 3.8.5 | Fishers' perception on fisheries management in Nandikadal Lagoon | 94 |
| CHAPTER 4 | | 95 |
| 4. | ASSESSMENT OF ANTICIPATED ENVIRONMENTAL IMPACTS | 96 |
| 4.1 | Constructional impacts..... | 96 |
| 4.2 | Hydrology impact | 97 |
| 4.2.1 | Impacts on existing drainage pattern (flow pattern) | 97 |
| 4.2.2 | Impact on soil erosion/siltation etc. | 98 |
| 4.2.3 | Impacts on the ground water table | 98 |
| 4.2.4 | Impacts on water quality due to mixing of dredged/leaked sea bed material and any associated contaminates/pollutants..... | 98 |
| 4.2.5 | Impacts to the beach, shoreline, estuary of the study area | 99 |
| 4.2.6 | Impacts on storage capacity of existing drains/ canals | 99 |
| 4.3 | Air /noise /vibration/ dust | 99 |
| 4.4 | Land stability..... | 100 |
| 4.5 | Waste water..... | 101 |
| 4.6 | Solid waste disposal..... | 101 |
| 4.7 | Ecological resources | 101 |
| 4.7.1 | Impacts due to destruction / alteration of habitats | 101 |
| 4.7.2 | Impacts on fauna and flora of the study area including | 102 |
| 4.7.3 | Existing natural habitats/ecosystems including sea grass beds, fishing grounds, breeding grounds..... | 102 |
| 4.7.4 | Impact on mangrove/associate mangrove ecosystems..... | 102 |
| 4.7.5 | Impacts on wildlife due to habitat conversion, disturbance to migratory pathways (wild animals) / --habitual routes of wild animals (eg: Elephants and other species)..... | 103 |

| | | |
|-----------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 4.7.6 | Impacts on aquatic ecosystems due to waste water disposal, dumping of excavated soil, demolished materials and debris, turbidity of water due to careless dredging etc. | 103 |
| 4.7.7 | Impacts on aquatic ecosystems (bottom macro zoobenthos) due to dredging activities and obtaining water from different sources..... | 103 |
| 4.7.8 | Impacts on due to the changes of salinity and pH values due to dredging | 103 |
| 4.8 | Socio economic / cultural impacts | 104 |
| 4.8.1 | Limitations for resources use | 104 |
| 4.8.2 | Impacts on livelihoods and economic activities..... | 105 |
| 4.9 | Impacts on cultural / archaeological values | 107 |
| 4.10 | Traffic impacts | 107 |
| 4.11 | Safety issues..... | 108 |
| 4.12 | Impacts on visual environment | 108 |
| 4.13 | Contingency management plan | 108 |
| CHAPTER 5 | | 109 |
| 5. | PROPOSED MITIGATION MEASURES..... | 110 |
| 5.1 | Constructional Impacts..... | 110 |
| 5.2 | Hydrology Impact | 110 |
| 5.3 | Air /noise /vibration/ dust..... | 112 |
| 5.4 | Land stability..... | 113 |
| 5.5 | Waste water | 114 |
| 5.6 | Solid waste disposal | 114 |
| 5.7 | Ecological resources..... | 114 |
| 5.8 | Socio economic / cultural impacts | 116 |
| 5.9 | Traffic impacts | 116 |
| 5.10 | Safety Issues..... | 117 |
| 5.11 | Contingency Management Plan | 117 |
| CHAPTER 6 | | 118 |
| 6. | ENVIRONMENTAL MANAGEMENT PLAN (EMP) | 119 |
| 6.1 | Institutional Arrangements..... | 119 |
| 6.2 | Environmental Monitoring Plan..... | 119 |
| 7. | CONCLUSION..... | 124 |
| 8. | REFERENCES | 126 |
