| <b>Abstract</b>  |      |
| <b>1 Introduction</b>  | 01   |
| 1.1 world milk fish production   |      |
| 1.2 Gondol Research Institute for Mari culture (GRIM)-Indonesia  | 01   |
| 1.3 Present situation and Problems, Constraints in brackish water culture, and possibilities for milk fish culture in Sri Lanka. | 02   |
| 1.4.Milk fish ( <i>Chanos chanos</i> )   | 02   |
| <b>2 Objectives of the Training</b>  | 05   |
| <b>3. Hatchery Management of Milk fish</b>   | 05   |
| <b>3.1 Brood Stock Management</b>  | 05   |
| 3.1.1 Collecting and transportation of breeders  | 05   |
| 3.1.2 Land and location for Hatchery   | 06   |
| 3.1.3 Tank size for rearing milk fish breeders   | 06   |
| 3.1.4 Water source and Quality   | 07   |
| 3.1.5 Water supply and Aeration  | 07   |
| 3.1.6 Maintenance of breeders  | 07   |
| 3.1.7 Reproduction   | 08   |
| 3.1.7.1. Selection breeders  | 08   |
| 3.1.7.2. Canulation and implanting   | 10   |
| 3.1.7.3 Spawning with Hormonal treatment   | 11   |
| Hormone treatment for matured and already spawned breeders   | 12   |
| Hormone treatment for matured but already not spawned breeders   | 12   |
| 3.1.7.3.1 Procedure for preparation of hormone pellets   | 12   |
| 3.1.7.4 Sex Ratio of breeders  | 14   |
| 3.1.7.5 Gonadal Development  | 14   |
| 3.1.7.6 Collection of eggs   | 15   |
| <b>3.2 Larval rearing</b>  | 15   |
| 3.2.1 Tank preparation   | 15   |
| 3.2.2 Water preparation  | 16   |

|  |    |
|--|----|
| 3.2.3 Aeration   | 16 |
| 3.2.4 Natural feed and artificial feeds used for larvae                        | 17 |
| 3.2.5 Stocking Density   | 17 |
| 3.2.6. Rearing and Management  | 20 |
| 3.2.7. Harvesting of milk fish fry   | 21 |
| <b>Larval Rearing Practical Works in Indonesia</b>                             | 23 |
| <b>3.3 Phytoplankton and Zooplankton culture</b>                               | 28 |
| 3.3.1 Phytoplankton  | 28 |
| 3.3.1.2 Taxonomy and micro algal morphology                                    | 28 |
| 3.3.1.3 Nutrient requirement for micro algal growth                            | 30 |
| 3.3.1.4 Mass production of <i>Nannochloropsis</i>                              | 30 |
| 3.3.1.4.1 Growth pattern of <i>Nannochloropsis</i>                             | 31 |
| 3.3.1.4.2. Out door culture of <i>Nannochloropsis</i>                          | 31 |
| Mass culture medium for <i>Nannochloropsis</i> . (for 1m <sup>3</sup> )        | 32 |
| 3.3.2 Zooplankton  | 32 |
| 3.3.2.1 Rotifer culture  | 33 |
| 3.3.2.1.1 out door rotifer culture (S type)                                    | 33 |
| <b>4. Feed development and preparation for finfish</b>                         | 34 |
| 4.1. Feed ration developed by GRIM for milk fish larvae                        | 36 |
| 4.2. Pellet feed developed for semi/intensive milk fish culture-Grow out ponds | 38 |
| <b>5. Disease</b>  | 38 |
| 5.1 What is disease?   | 38 |
| 5.2 Disease of milk fish   | 41 |
| 5.2.1 Parasitic disease of milk fish   | 41 |
| 5.3. Chemicals for making Buffer formalin                                      | 43 |
| <b>6 Culturing of milk fish for tuna bait in Indonesia</b>                     | 44 |
| 6.1 Pond operational procedure   | 44 |
| Harvesting   | 45 |
| <b>7 Conclusions</b>   | 46 |
| <b>Reference</b>   | 47 |
