

TABLE OF CONTENTS

PAGE

1. Introduction	03
2. Preparation and evaluation of raw materials	05
3. Pilot scale method of processing	15
4. Operational cost calculation	17
5. Cooking method and acceptability	22
6. Quality Grade	22
7. Storage Test	23
8. Conclusion and recommendation	24
9. References	24

Appendix

Table	I. Sequence of operations for preparation of dehydrated fish powder
Table	II. Chemical composition of fish mince in different stages of processing
Table	III. Chemical composition of fish mince in different time periods of drying
Table	IV. Sequence of operations for preparation of onion powder
Table	V. Sequence of operations for preparation of corriander powder
Table	VI. Sequence of processing dry fish soup mix from Silverbelly
Table	VII. Chemical composition of different types of imported dry soup mixes available in the local market, compared with the soup prepared at IPHT
Table	VIII. Ingredients required for the preparation of 2140 packets of dry fish soup mix per day and their cost calculation
Table	IX. Chemical analysis of dry fish soup in relation to the use of anti-oxidant
